## OTE Group Jobs

# IT Business Analyst @Volos

### What You'll Do:

- Work in collaboration with various teams such as Product Management, Data Science, Software Engineering, and IT within an agile environment to understand business needs and objectives
- Assist in analyzing business processes and workflows with the objective of finding out how they can be improved or automated
- Contribute to the collection and documentation of business requirements from various stakeholders
- Participate in the development and implementation of business solutions, under the guidance of senior analysts or Product Owners.
- Learn and apply data analysis techniques to provide insights and support evidence-based decision-making
- Assist in creating presentations and reports to communicate findings and recommendations to the team and management

### Required Skills:

- Basic understanding of business process analysis, documentation, and modeling
- Fundamental understanding of IT architecture and technologies, including an awareness of how various systems and tools can be leveraged for business solutions
- Eagerness to learn about Agile methodologies and practices
- Good communication and interpersonal skills, with an ability to interact effectively with team members and stakeholders
- A proactive approach to problem-solving and a willingness to take on new challenges

## What we offer
